Urban Renewal, Housing Projects, and W(h)ither Modernism?
-- A Discussion of *The Pruitt-Igoe Myth*

Directed by Chad Freidrichs, released in 2011

American Urban Renewal

- land redevelopment to ameliorate urban decay
- demolition of blighted areas and slum districts
- catalyzed in part by public funds
- creating opportunity for private development of higher class housing
- privately owned properties within a designated renewal area are purchased or taken by eminent domain by a municipal redevelopment authority, razed and then sold to selected developers who devote them to other uses
- **Housing Act of 1949**
 - federal financing for slum clearance programs associated with urban renewal projects in American cities (Title I)
 - increased authorization for the Federal Housing Administration (FHA) mortgage insurance (Title II)
 - extension of federal money to build more than 800,000 public housing units (Title III)
 - funding for research on housing and building techniques (Title IV)
 - financing of "dwelling and other farm buildings on ... farms" (Title V)

“urban amelioration”

conflation of poverty, race, and morality

hygiene + cleansing – cleaning the city

white walls of modern architecture translated into urban
ethos and urban scale

Urban renewal wreaked an enormous human toll. An estimated 1 million people in 993 neighborhoods across the U.S. were forced to relocate by urban renewal policies, most without any compensation. A disproportionate number of them were poor and/or minority.

Wallace Harrison, Governor Nelson A. Rockefeller Empire State Plaza (known commonly as the Empire State Plaza, and also as the South Mall), 1965-76

- The 98-acre area was made up of several distinct neighborhoods.
- To the south, clustered around Madison and Grand streets was the heart of Albany's Italian American community.
- Although only about half of Little Italy was seized by the State, the demolition and subsequent noise and dirt associated with the construction of the Empire State Plaza led many residents to move, even if their homes were not appropriated.
- To the north lay Albany's rooming house district, centered on Jay, Lancaster, and Hudson streets between Eagle and S. Swan.
- About 10% of the buildings torn down for the Empire State Plaza were rooming houses. In them lived over 1,000 single men, often elderly and poor.
- They made up about one third of all households and at least 15% of the take area's population.
- The eastern part of the take area, where the South Mall Arterial is now, was Albany's "Gut", an area of cheap hotels, flophouses, and dive bars.
- The take area also boasted elegant homes, particularly on State Street at the northern end and Elm Street below Madison

The Cabrini-Green public housing development was built over the course of 20 years as part of the Chicago Housing Authority's approach to the "urban renewal" philosophy sweeping the nation. Begun in 1942 as the Francis Cabrini Rowhouses, the Cabrini Extensions North and South were added in 1958, followed by the William Green Homes in 1962. The complex totaled 70 acres on Chicago's near North Side.

GOOD TIMES

Construction of Stateway Gardens, Chicago, 1958

It was located alongside the Dan Ryan Expressway, adjacently north of the former Robert Taylor Homes, and was part of the State Street Corridor. In 1955, construction at Stateway Gardens commenced, with 1,644 units planned in eight high-rise buildings.

The total cost for the project was \$22 million.

Three years later, construction was complete and approximately 3,000 people moved in. In 1978, a major CHA renovation plan costing \$106.2 million was undertaken.

St. Louis urban erasure and transformation

St. Louis urban erasure and transformation

St. Louis urban erasure and transformation

The housing stock in St. Louis had deteriorated between the 1920s and the 1940s, and more than 85,000 families lived in 19th- century tenements. An official survey from 1947 found that 33,000 homes had communal toilets. In 1947, St. Louis planners proposed to replace DeSoto-Carr, a run-down neighborhood, with new two- and three-story residential blocks and a public park. This plan fell through.

After the Federal Housing Act of 1949, the St. Louis Land Clearance and Redevelopment Authority was authorized to acquire and demolish the slums of the inner ring and then sell the land at reduced prices to private developers, fostering middle-class return and business growth. Another agency, St. Louis Housing Authority, had to clear land to construct public housing for the former slum dwellers. By 1950, St. Louis had received a federal commitment under the Housing Act of 1949 to finance 5,800 public housing units.

MINNESOTA DEPARTMENT OF HIGHWAYS
IN COOPERATION WITH THE BUREAU OF PUBLIC ROADS

The Federal-Aid Highway Act of 1956, popularly known as the National Interstate and **Defense** Highways Act (Public Law 84-627), was enacted on June 29, 1956, when President Dwight D. Eisenhower signed the bill into law. With an original authorization of \$25 billion for the construction of 41,000 miles (66,000 km) of the Interstate Highway System supposedly over a 10-year period, it was the largest public works project in American history through that time. Today this system consists of over 160,000 miles of roadways. All urban areas with a population of over 50,000 and about 90% of America's population live within five miles (8.0 km) of the network.

WHITE FLIGHT AND MID-CENTURY SUBURBANIZATION

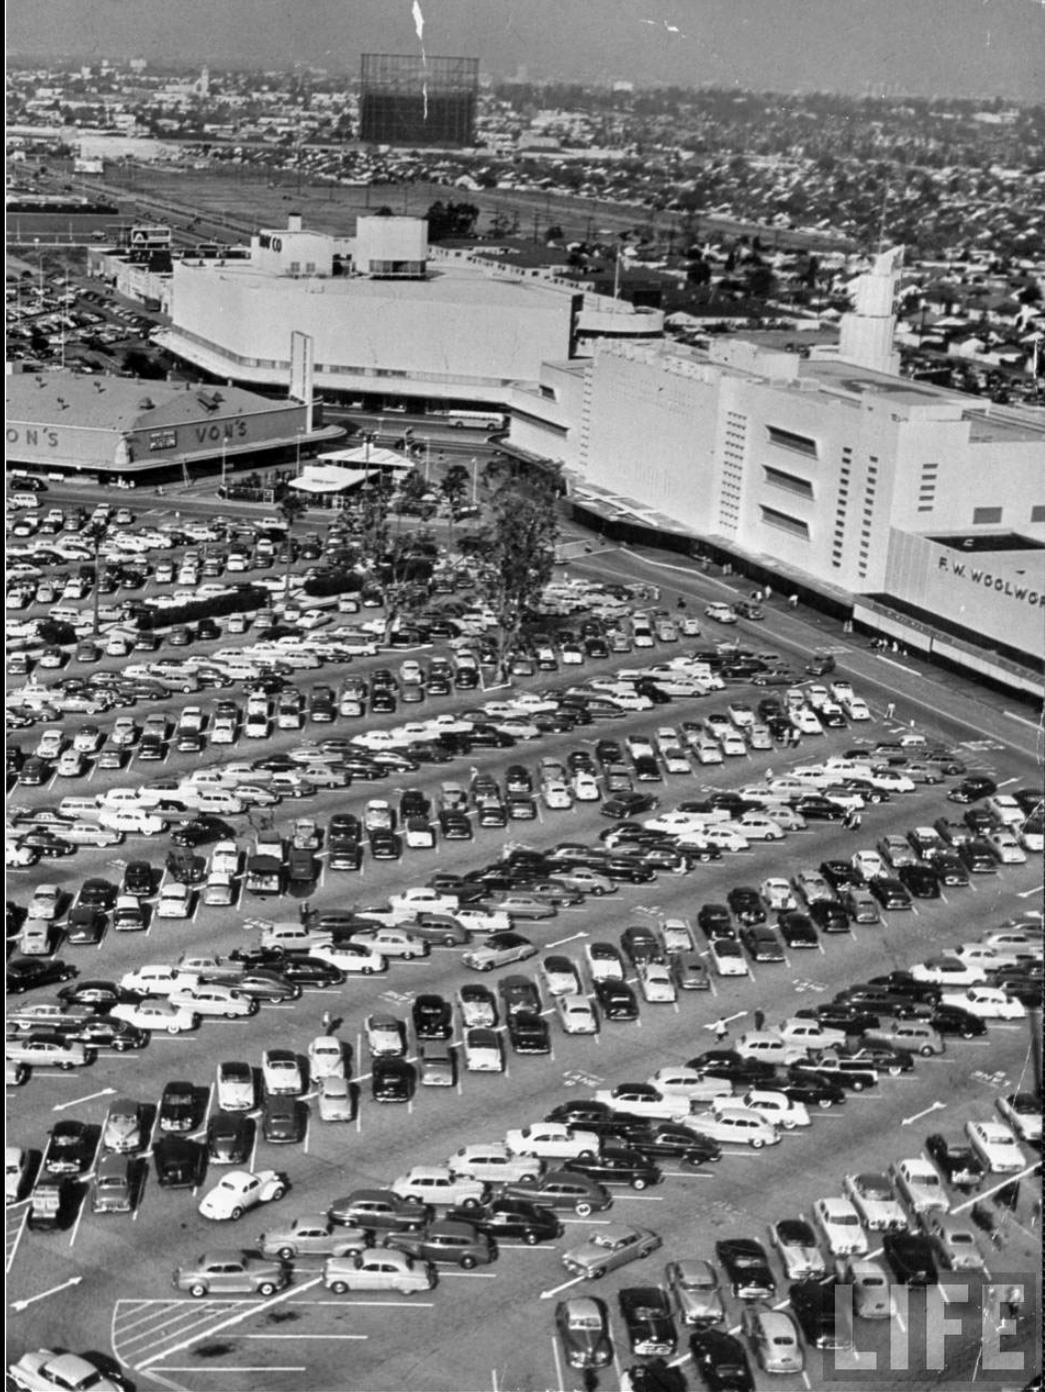

- New Deal policymakers realized that restoring the economy depended on restoring the housing sector. In 1934, they created the Federal Housing Administration (FHA) with two key mandates:
 - Revive the housing market, and
 - Make homeownership attainable for more Americans.

- By making an offer lenders couldn't refuse, the FHA exercised tremendous power over residential design. Mortgages had to meet an opinionated set of criteria to qualify for the federal insurance. Lenders could invest in mortgages not covered by the program, but they had a strong preference for homes that conformed to the guidelines. Compliance was mandatory for the insurance, so lenders pressured developers to follow the rules. By 1959, 25 years after it was formed, the FHA had helped three out of every five American families purchase a home.
- FHA rules had implicit and explicit hierarchies of what homeowners ought to want. They had two key purposes: to stimulate the economy, and to constrain the market to only good investments. These goals — plus social assumptions of the time — were reflected in the FHA's evaluation of a mortgage. The standards included:
 - Large, new homes were given a higher score, because they increased demand for labor and materials. Older homes with small spaces didn't create demand for new furniture. Features like long hallways and steep staircases lowered the rating, because they prevented easy moving of furniture.
 - Homogeneity of neighboring housing stock was believed to indicate stable housing prices. To get the max score on the FHA evaluation, the manual preferred that a house be a part of "a sparsely developed new neighborhood ... completed over the span of very few years."
 - The ideal house had "sunshine, ventilation, scenic outlook, privacy, and safety", and "effective landscaping and gardening" added to its worth. The guide recommended that houses should be set back at least 15 feet from the road, and well-tended lawns that matched the neighbors' yards helped the rating.

LIFE

LIFE

Meanwhile back in the city center...

RED-LINING

Red-lining: the systematic denial of various services to residents of specific, often racially associated, neighborhoods or communities, either directly or through the selective raising of prices.

Left: A Home Owners' Loan Corporation 1936 security map of Philadelphia showing redlining of lower income neighborhoods

MORTGAGE DISCRIMINATION

Mortgage discrimination or mortgage lending discrimination is the practice of banks, governments or other lending institutions denying loans to one or more groups of people primarily on the basis of race, ethnic origin, sex or religion.

Left: Sign with American flag "We want white tenants in our white community," directly opposite the Sojourner Truth homes, a new U.S. federal housing project in Detroit, Michigan. A riot was caused by white neighbors' attempts to prevent African American tenants from moving in.

Athens Charter 1943
(1930-43)
Congrès International
d'Architecture
Moderne [CIAM]

- rationalization of movement within an urban zone
- separation of pedestrians from vehicles
- skyscrapers instrumental in dividing live-work space from recreational space
- towers for live-work leaving open ground space for recreation
- open green space

Plan Voisin, 1925

What is the connection here?

Is modern
architecture
inherently
dehumanizing, racist,
and discriminatory?

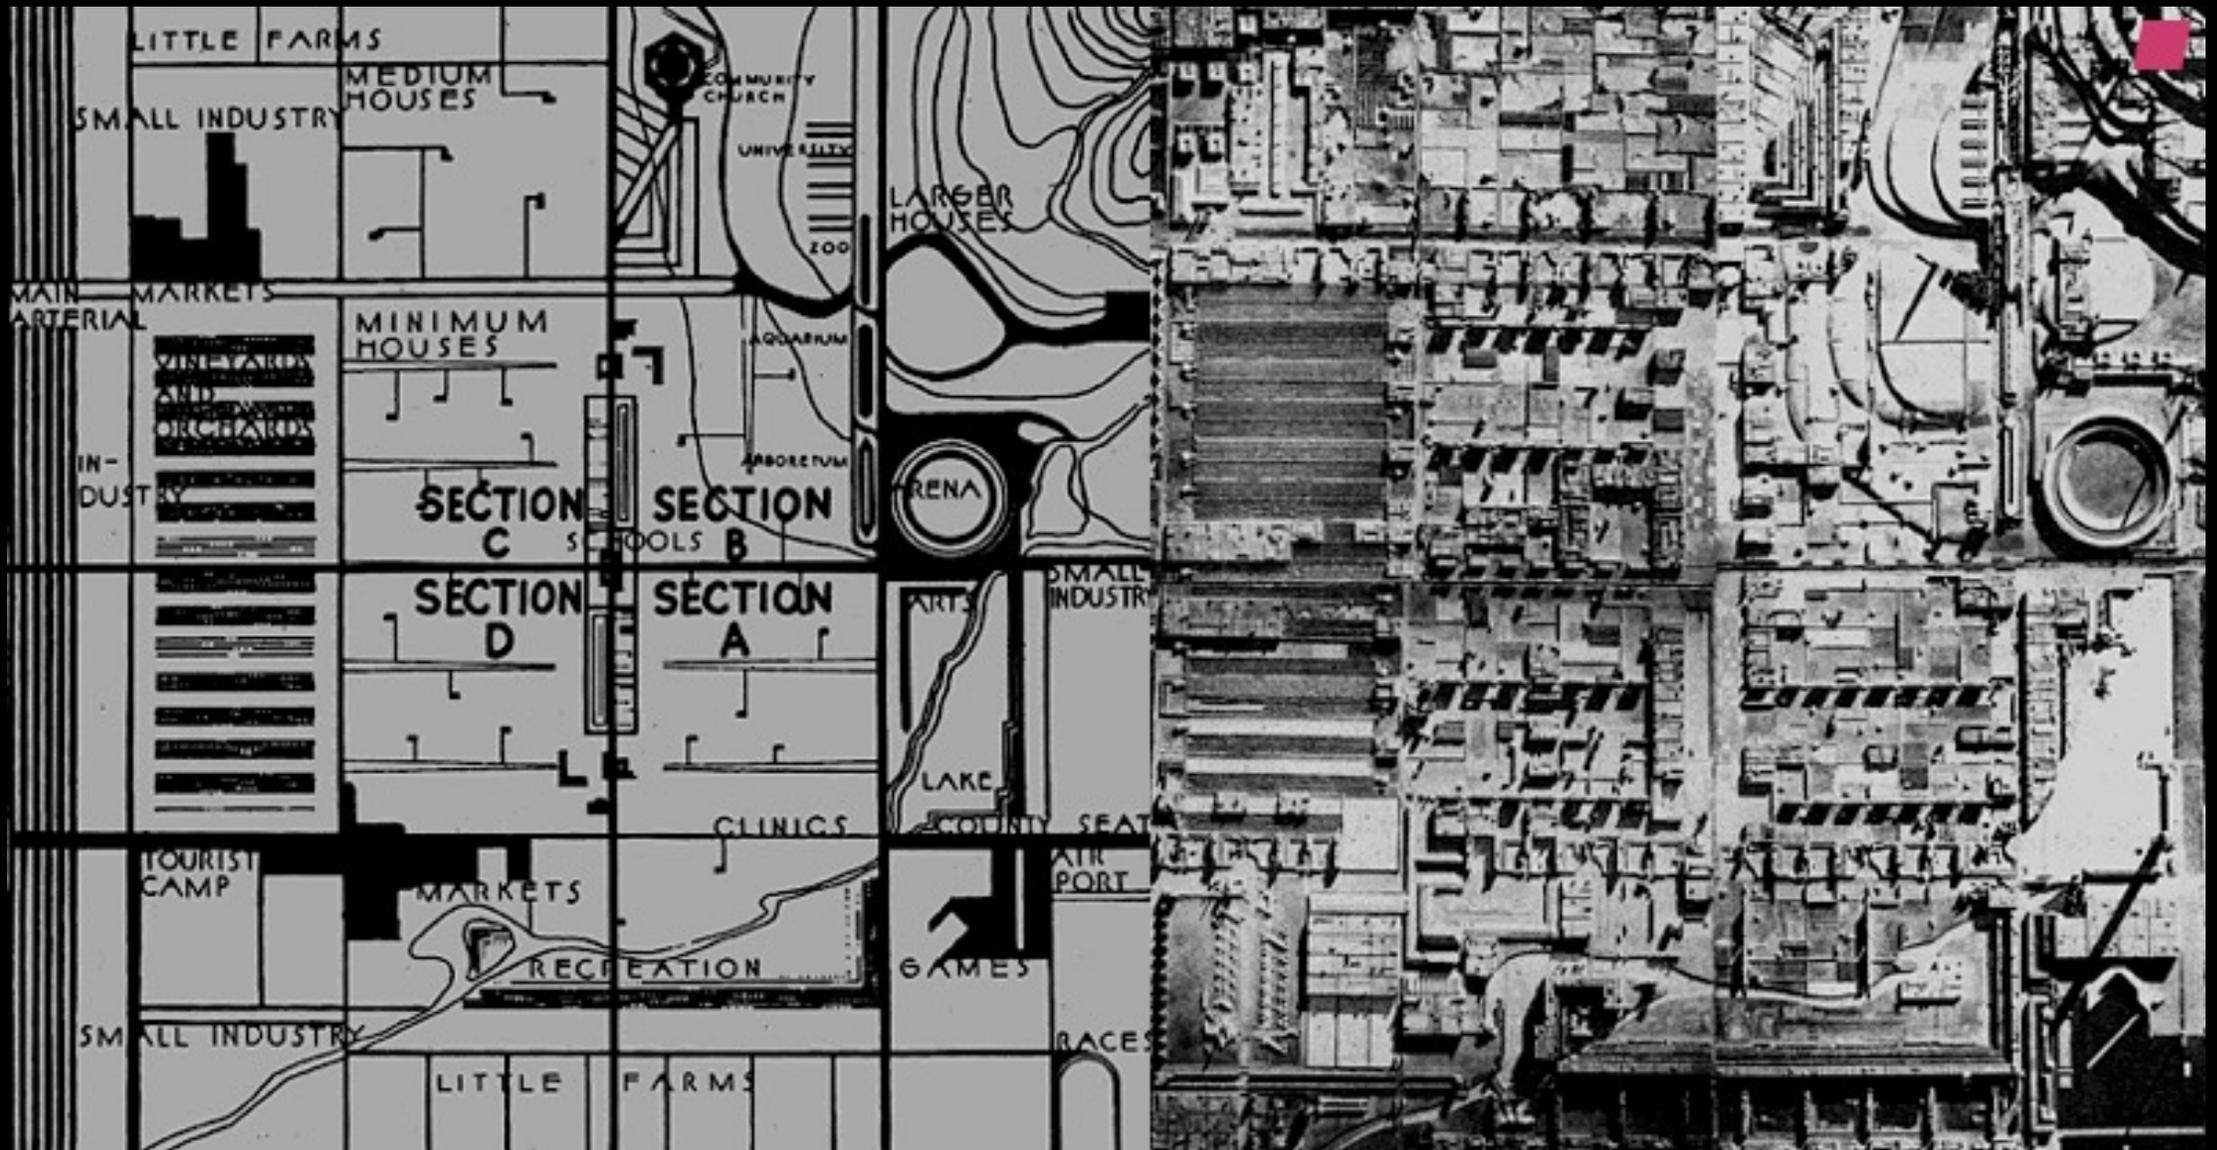

Le Corbusier, Villa Savoye, Poissy, 1928-31

Are skyscrapers
inherently bad --
dehumanizing,
racist, and
discriminatory??

Ludwig Mies van der Rohe, Project
for an Office building in the
Freidrichstrasse, Berlin, 1919-1921

Urban disenfranchisement
vs.
Suburban enfranchisement

Frank Lloyd Wright, Broadacre City, drawing and model, 1934-35

Where do the urban designs of Frank Lloyd Wright sit within this debate?

How does a related urban-rural dyad (urban versus rural) work it self out in contemporary politics?

“We give more political power to land than to people in this country.” Michelle Goldberg

KEYNOTE SPEAKERS

MICHELLE GOLDBERG

Michelle Goldberg is a columnist for the *The New York Times*, where she was part of the team that won the Pulitzer Prize in 2018 for public service for reporting on workplace sexual harassment issues. She is the author of three books: “Kingdom Coming: The Rise of Christian Nationalism,” “The Means of Reproduction: Sex, Power, and the Future of the World,” and “The Goddess Pose: The Audacious Life of Indra Devi, the Woman Who Helped Bring Yoga to the West.” Her first book was a finalist for the Helene Bernstein Award for Excellence in Journalism, and her second won the Ernesta Drinker Ballard Book Prize and the J. Anthony Lukas Work-In-Progress Award.

Goldberg is a co-host of the podcast *The Argument* and an MSNBC contributor. Her work has appeared in *The New Yorker*, *Newsweek*, *The Nation*, *The New Republic*, *The Guardian* and many other publications. She has reported from countries including Iraq, Egypt, Uganda, Nicaragua and Argentina. She lives in Brooklyn with her husband and children.
