Allison Knowles
and James
Tenney,
The House of
Dust, 1974

Alison Knowles' computer-generated poem and sculpture *House of Dust* was created in association with James Tenney. The work had its beginnings at an informal Fluxus seminar in 1967 in which Tenney, who had been a composer-in-residence at the Bell Labs in the early '60s, demonstrated how the Fortran programming language could be employed in chance operations in artmaking. Knowles' contribution to the session was a poem of the in which combinations of the variables were randomly generated. It's generally considered to be the first computer-generated poem. Knowles then embarked on the creation of a large interactive public sculpture and sound installation inspired by one quatrain of the poem ("a house of dust, on open ground, lit by natural light, inhabited by friends and enemies"), in which electronic sensors would control sound equipment in response to varying light levels. The sculpture was briefly installed on the lawn of New York's Penn South housing co-op, but it generated opposition from residents and was ultimately set on fire by an arsonist, a surprisingly violent expression of hostility toward a work of public art. In 1970 Knowles brought the reconstructed *House of Dust* with her to CalArts.

Gathering inside the House of Dust for a screening, c. 1974

FLUXUS

flux (flüks), *n.* [OF., fr. L. *fluxus*, fr. *fluere*, *fluxum*, to flow. See FLUENT; cf. FLUSH, *n.* (of cards).] 1. *Med.*

a A flowing or fluid discharge from the bowels or other part: esp., an excessive and morbid discharge: as, the bloody *flux*, or dysentery. **b** The matter thus discharged.

2. Act of flowing: a continuous moving on or passing by, as of a flowing stream; a continuing succession of changes.

3. A stream; copious flow; flood; outflow.
4. The setting in of the tide toward the shore. Cf. REFLEX.
5. State of being liquid through heat; fusion. *Rare.*
6. A fusible glass used as a base for enamels; also, an easily fusible enamel used as a ground for enamel painting.
7. *Chem. & Metal.* **a** Any substance or mixture used to promote fusion, esp. the fusion of metals or minerals. Common metallurgical fluxes are silica and silicates (acidic), lime and limestone (basic), and fluorite (neutral). **b** Any substance applied to surfaces to be joined by soldering or welding, just prior to or during the operation, to clean and free them from oxide, thus promoting their union, as rosin.
8. *Math.* The integral over a surface of the normal component of a vector field. Cf. STOKES' THEOREM.
9. *Photom.* = 1st LIGHT, 18 **b**.
10. *Physics.* **a** The rate of flow or transfer of fluid or of energy across a surface. **b** By analogy, the surface integral of a vector distributed over a surface. Cf. ELECTROSTATIC FLUX, MAGNETIC FLUX.
11. *Plant Pathol.* A slime flux.

flux, *v.*; FLUXED (flükst); FLUX'ING. *Transitive:* 1. To cause to become fluid; to fuse; to treat with a flux.

2. To affect, or bring to a certain state, by subjecting to, or treating with, a flux. "*Flured* into another world." *South.*

3. *Med.* To cause a discharge from, as in purging.

—, *Intransitive:* 1. To flow freely. *Archaic.*

2. To become fluid; to melt.

3. To undergo a flux; specif., to bleed copiously. *Obs.*

flux (flüks), *adj.* [L. *fluxus*, fr. *fluere*. See FLUX, *n.*]

Summer, 1961

George Maciunas, Fluxus Preview Review, 1963

George Brecht, Event Score, 1961

Bodies in Art

- **Abstract Expressionism: Jackson Pollock's technique [haptic vs. Clement Greenberg's "opticality"]**
- **Allan Kaprow: from painting to happening**
- **Leo Steinberg's "flatbed picture plane"**
- **John Cage's silence as a means of embodiment**
- **FLUXUS**

- Born in Los Angeles to John Milton Cage, Sr., an inventor, and Lucretia ('Crete') Harvey, an amateur artist and occasional journalist for *The Los Angeles Times*.
- Worked during the heyday of Abstract Expressionism
- Honed his skills in the midst of the growing American avant garde. Neither a painter or a sculptor,
- Incorporated unconventional instrumentation and the idea of environmental music dictated by chance.
- Approach to composition was deeply influenced by Asian philosophies, focusing on the harmony that exists in nature, as well as elements of chance.
- Famous not only for his radical works, like *4'33"* (1952), in which the ambient noise of the recital hall created the music, but also for his innovative collaborations with artists like Merce Cunningham and Robert Rauschenberg.
- These partnerships helped break down the divisions between the various realms of art production, such as music, performance, painting, and dance, allowing for new interdisciplinary work to be produced.
- Cage discovered that chance was as important of a force governing a musical composition as the artist's will, and allowed it to play a central role in all of his compositions. Although each piece has a basic, composed structure, the overall effect varied with each performance as different variables like the location and audience directly affected the sounds that were produced.
- By breaking with the historically determined preconception that music was made by musicians using traditional instruments to perform structured and prearranged compositions, Cage opened up a new wealth of possibilities within modern art. His revolutionary performances ushered in an era of experimentation in all media and shifted the focus away from the artist's inner psyche to the artist's contemporary environment.
- Cage focused his compositional career on the incorporation of unconventional elements such as kitchen gadgets, metal sheets, various common objects, and even silence into his works to change the way modern audiences listened to music and appreciated their surroundings.
- Taught groundbreaking courses on composition at the New Bauhaus, Black Mountain College, and The New School in NY
- Many artists, such as R. Rauschenberg, E. Kienholz, and members of the Fluxus group, too Cage's course in experimental composition at The New School, which he taught from 1956 to 1961.

John Cage (1912-1992)

Dick Higgins, a Fluxus artist, claimed:
“The principle ideas we came to share,
mainly through Cage, were derived
from Zen-Buddhism, the I-Ching, Eric
Satie, and Marcel Duchamp.”

Above: Sign for Black Mountain College, which hosted John Cage, David Tudor, Robert Rauschenberg, et. al., in Theater Piece No. 1, 1952, the first happening

MUSIC AND MUSIC WORKSHOPS

1031 COMPOSITION

Fall. Tuesdays, 4:20-6:00 P.M. \$24. (Reg. fee: p. 6)

JOHN CAGE

Beginning September 25. Experimental music, a course in musical composition with technical, musicological, and philosophical aspects, open to those with or without previous training.

Whereas conventional theories of harmony, counterpoint and musical form are based on the pitch or frequency component of sound, this course offers problems and solutions in the field of composition based on other components of sound: duration, timbre, amplitude and morphology; the course also encourages inventiveness.

A full exposition of the contemporary musical scene in the light of the work of Anton Webern, and present developments in music for magnetic tape (musique concrète; elektronische Musik).

Musique concrète (meaning “concrete music”) is a genre of electroacoustic music that is made in part from acousmatic sound. It can feature sounds derived from recordings of musical instruments, voice, and the natural environment as well as those created using synthesizers and computer-based digital signal processing. Also, compositions in this idiom are not restricted to the normal musical rules of melody, harmony, rhythm, metre, and so on. Originally contrasted with “pure” *elektronische Musik* (based solely on the production and manipulation of electronically produced sounds rather than recorded sounds), the theoretical basis of *musique concrète* as a compositional practice was developed by Pierre Schaeffer, beginning in the early 1940s. Daphne Oram was one of the first British composers to produce electronic sound, a pioneer of what became “musique concrete” – music made with sounds recorded on tape, the ancestor of today's electronic music.

<https://courses.lumenlearning.com/suny-musicapp-medieval-modern/chapter/musique-concrete/>

Left: Daphne Oram, pioneer of electronic music
Right: Pierre Schaeffer at the Studio 54 desk adjusting a Moog

By 1949 Schaeffer's compositional work was known publicly as *musique concrète*. Schaeffer stated: "when I proposed the term 'musique concrète,' I intended ... to point out an opposition with the way musical work usually goes. Instead of notating musical ideas on paper with the symbols of solfege and entrusting their realization to well-known instruments, the question was to collect concrete sounds, wherever they came from, and to abstract the musical values they were potentially containing."

According to Pierre Henry, "musique concrète was not a study of timbre, it is focused on envelopes, forms. It must be presented by means of non-traditional characteristics, you see . . . one might say that the origin of this music is also found in the interest in "plastifying" music, of rendering it plastic like sculpture...musique concrète, in my opinion . . . led to a manner of composing, indeed, a new mental framework of composing." Schaeffer had developed an aesthetic that was centered upon the use of sound as a primary compositional resource. The aesthetic also emphasised the importance of play (*jeu*) in the practice of sound based composition. Schaeffer's use of the word *jeu*, from the verb *jouer*, carries the same double meaning as the English verb play: "to enjoy oneself by interacting with one's surroundings," as well as "to operate a musical instrument."

EVENT SCORES

THREE TELEPHONE EVENTS

- When the telephone rings, it is allowed to continue ringing, until it stops.
- When the telephone rings, the receiver is lifted, then replaced.
- When the telephone rings, it is answered.

Performance note: Each event comprises all occurrences within its duration.

Spring, 1961

THREE LAMP EVENTS

- on.
off.
- lamp
- off. on.

"It is sure to be dark
if you shut your eyes." (J. Ray)

Summer, 1961

Event Scores, involve simple actions, ideas, and objects from everyday life recontextualized as performance. Event Scores are texts that can be seen as proposal pieces or instructions for actions. The idea of the score suggests musicality. Like a musical score, Event Scores can be realized by artists other than the original creator and are open to variation and interpretation.

Following scores are taken from BY ALISON KNOWLES from A GREAT BEAR PAMPHLET (1965)

- **#1 Shuffle (1961)**

The performer or performers shuffle into the performance area and away from it, above, behind, around, or through the audience. They perform as a group or solo: but quietly.

Premiered August 1963 at National Association of Chemists and Performers in New York at the Advertiser's club.

- **#2 Proposition (1962)**

Make a salad.

Premiered October 21st, 1962 at Institute for Contemporary Arts in London.

- **#2a Variation #1 on Proposition (1964)**

Make a soup.

Premiered Nov 9th, 64 at Cafe au Go Go in NY.

- **#3 Nivea Cream Piece (1962) - for Oscar Williams**

First performer comes on stage with a jar of Nivea cream. The performer massages hands in front of the microphone. Other performers enter one at a time. They make a mass of massaging hands and leave one at a time following the first performer. [click here](#) to listen to a recording from Fluxsweet concert at [Harvestworks](#) organized by Taketo Shimada

Premiered Nov 25, 62 at Alle Season Theater, Copenhagen at Fluxus Festival.

- **#3a Variation #1 on Nivea Cream Piece**

Large quantities of Nivea Cream must be available, at least one large jar per person. The performers enter and each lathers up his arms and face, then his colleagues, in a fragrant pig pile.

- **#4 Child Art Piece (1962)**

The performer in a single child, two or three years old. One or both parents may be present to assist him with a pail of water or a banana etc. When a child leaves the stage the performance is over.

Premiered at the Fluxus Festival, Staatliche Kunstakademie, Dusseldorf on Feb 3rd, 63.

Artist: John Cage

Title: "Fontana Mix"

Date: 1958

Details: Experimental musical composition

<https://www.youtube.com/watch?v=05wBPhWD44U>

Fontana Mix consists of a total of 20 pages of graphic materials: ten pages covered with six curved lines each, and ten sheets of transparent film covered with randomly-placed points. In accordance with a specific system, and using the intersecting points of a raster screen, two of the pages produce connecting lines and measurements that can be freely assigned to musical occurrences such as volume, tone color, and pitch. The interpreter no longer finds a score in the customary sense, but rather a treatment manual for the notation of a composition.

<http://www.medienkunstnetz.de/works/fontana-mix/>

John Cage performing "Water Walk" in January, 1960 on the popular TV show I've Got A Secret:

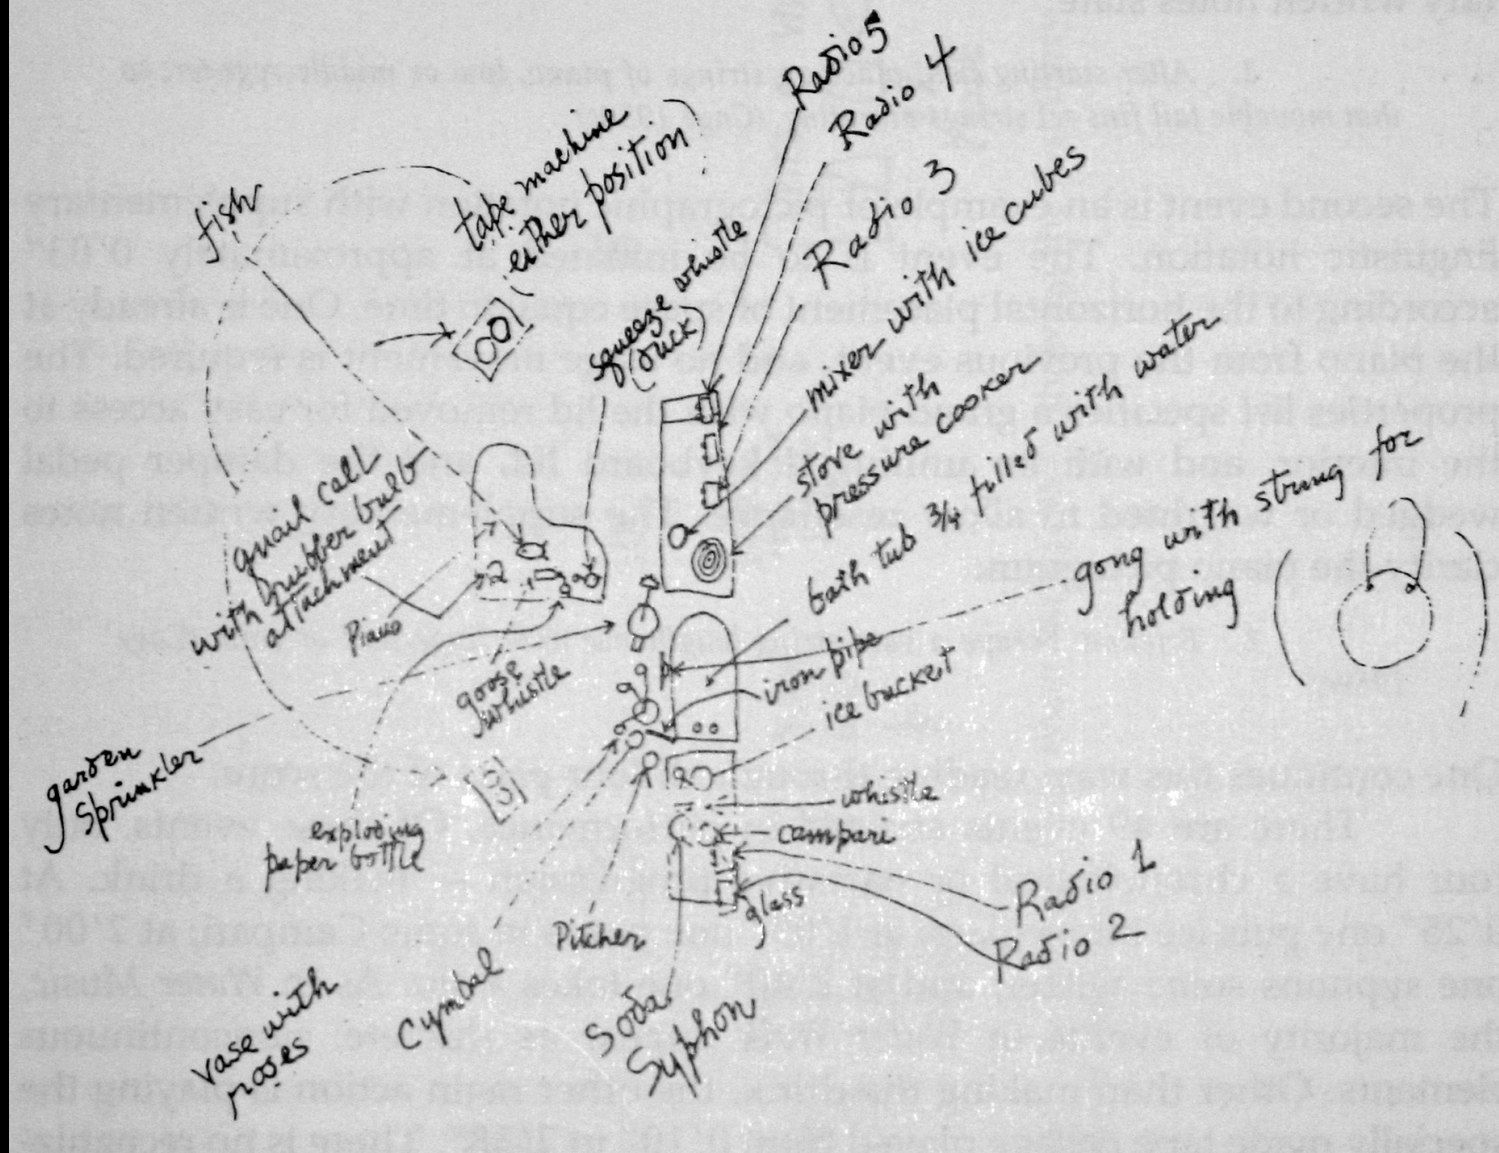

<https://www.youtube.com/watch?v=SSulycqZH-U&t=4s>
<https://www.youtube.com/watch?v=gXOIkT1-QWY>

Cage performed "Water Walk" on *I've Got a Secret*, the long-running occupation-guessing game show whose guest roster also included chess prodigy Bobby Fischer, "fifth Beatle" Pete Best, and fried-chicken icon Colonel Harland Sanders. For this particular episode, wrote Dan Colman in our earlier post, "the TV show offered Cage something of a teachable moment, a chance to introduce the broader public to his brand of avant-garde music."

For *Water Walk*, Cage rounded up a variety of "instruments" all to do with that liquid — a bathtub, a pitcher, ice cubes in a mixer — and the unconventional symphony they produce culminates in the Rube Goldbergian mixing of a drink, the sipping of which the composition dictates about two and a half minutes in. Naturally, Cage being Cage, the piece incorporates audience reaction noises; when host Gary Moore warns him that certain members of the studio audience will laugh, Cage responds, "I consider laughter better than tears."

In the group known as Fluxus we see a diminution of the idea of art being created by a single figure, the artist as genius-creator, as genius-hero. Rather, art should be a group endeavor and anonymous in terms of authorship.

In the figure of the Lithuanian-born Maciunas we see something of an art historian com impresario-manque. Coining the term “fluxus,” Maciunas gave the group its name. When asked in 1978, the last year of his life, whether or not he thought that Fluxus was art, he replied “No. I think it’s good inventive gags.” After all and amid all he thought of himself as someone who made good jokes.

Leaving Europe for the USA in 1948, Maciunas settled in New York City with his parents, there diligently taking up the study of art history. He had three courses of study: 1949-52 art, graphic art and architecture at the Cooper Union, New York; 1952-54 architecture and musicology at Carnegie Institute of Technology in Pittsburgh; and 1955-1960, a continuous study of European and Siberian art at the time of medieval migration of peoples undertaken at the Institute of Fine Arts of NYU.

George F. Maciunas

1931-1978

In 1961, Maciunas opened AG Gallery on Madison Avenue in NYC. While he would ultimately incur terrible losses, sending him to Germany fleeing creditors, the gallery would be the crucible for Fluxus as a movement. George Maciunas, Announcement card for *Evenings*, AG Gallery, New York, July 1961

PICKET STOCKHAUSEN CONCERT!

"Jazz [Black music] is primitive... barbaric... beat and a few simple chords... garbage... [or words to that effect]" Stockhausen, Lecture, Harvard University, fall 1958

RADICAL INTELLECTUALS:

Of all the world's cultures, aristocratic European Art has developed the most elaborate doctrine of its supremacy to all plebeian and non-European, non-white cultures. It has developed the most elaborate body of "Laws of Music" ever known: Common-Practice Harmony, 12-Tone, and all the rest, not to mention Concert etiquette. And its contempt for music which break those Laws is limitless. Alfred Einstein, the most famous European Musicologist, said of "Jazz" that it is "the most abominable treason", "Necadem", and so forth. Aristocratic European Art has had a monstrous success in forcing veneration of itself on all the world, especially in the imperialist period. Everywhere that Bach, Beethoven, Bruckner and Stockhausen are huckstered as "Music of the Masters", remany has triumphed. Its greatest success is in North America, whose rulers take the Art of West Europe's rulers as their own. There is a Brussels European Music Competition to which musicians come from all over the world; why is there no Competition, to which European Musicians come, of Arab Music? (Or Indian, or Classical Chinese, or Yoruba, or Bembey, or Tibetan percussion, or Inca, or hillbilly music?)

STOCKHAUSEN AND HIS KIND

Stockhausen is a characteristic European-North American ruling-class Artist. His magazine, *The Series*, has hardly condescended to mention plebeian or non-European music at all! but when it has, as on the first page of the fourth number, it leaves no category for it except "light music" that can be summed up by adding a question-mark after "music". Stockhausen's doings are supported by the West German Government, as well as the rich Americans J. Brimberg, J. Slinkin and A. Everett. If there were a genuine equality of national cultures in the world today, if there were no discrimination against non-European cultures, Stockhausen couldn't possibly enjoy the status he does now. But Stockhausen's real importance, which separates him from the rich U.S. cretins Leonard Bernstein and Benny Goodman, is that he is a fountainhead of "ideas" to shore up the doctrine of white plutocratic European Art's supremacy, enunciated in his theoretical organ *The Series* and elsewhere.

BUT THERE IS ANOTHER KIND OF INTELLECTUAL

There are other intellectuals who are restless with the domination of white plutocratic European Art. Maybe they happen to like Bo Diddley or the Everly Brothers. At any rate, they are restless with the Art maintained by the imperialist governments. To them we say: THE DOMINATION OF WHITE PLUTOCRATIC EUROPEAN ART HOLDS YOU TOO IN BONDAGE! You cannot be intellectually honest if you believe the doctrine of plutocratic European Art's supremacy, those "Laws of Art". They are arbitrary myths, maintained ultimately by the repressive violence that keeps oppressed peoples from power. Then, the domination of patrician Art—which is aristocrat-plutocrat in origin, as Opera House etiquette alone shows—condemns you to be surrounded by the stifling, culturally mentality of social-climbing snobs. It binds you to the most patriarchal variety of the small merchant mentality, as promoted by *Reader's Digest* - "Music That Embodies You to Listen to It". Even worse, though, the domination of imperialist white European plutocrat Art condemns you to live among white masses who have a sick, helpless fear of being contaminated by the "primitivism" of the colored peoples' cultures. Yes, and this sick cultural racism, not "primitive" music, is the real barbarism. What these whites fear is actually a kind of vitality the cultures of these oppressed peoples have, which is undreamed of by their white masters. You lose this vitality. Thus, nobody who acquiesces to the domination of patrician European Art can be revolutionary culturally—no matter what else he may be.

THE FIRST TASK

The first cultural task of radical intellectuals, especially whites, today, is:

- (1) not to produce more Art (there is too much already)
- (2) not to concede in private that non-European culture might have an "ethnic" validity;

THE FIRST CULTURAL TASK IS PUBLICLY TO EXPOSE AND FIGHT THE DOMINATION OF WHITE, EUROPEAN-U.S. RULING-CLASS ART!

Whatever path of development the non-European, non-white peoples choose for their cultures, we will fight to break out of the stifling bondage of white, plutocratic European Art's domination.

STOCKHAUSEN-PATRICIAN "THEORIST" OF WHITE SUPREMACY: GO TO HELL!

Action Against Cultural Imperialism
359 Canal Street, New York, N.Y. 10013.

(April 29, 1964: First AACI Demonstration)

Stockhausen, the modern composer, declares "Jazz [black music] is primitive...barbaric...beat and a few simple chords...garbage."

They respond "Of all the world's cultures, aristocratic European Art has developed the most elaborate doctrine of its supremacy to all plebeian and non-European, non-white cultures....There are other kinds of intellectuals who are restless with the domination of white plutocratic European art...Nobody who acquiesces to the domination of patrician European Art can be revolutionary culturally -- no matter what else he may be. The first cultural task of radical intellectuals, especially whites, today is: 1.) Not to produce more Art (there is too much already) 2.) not to concede in private that non-European culture might have an 'ethnic' validity."

FLUX

flux (flüks), *n.* [OF., fr. L. *fluxus*, fr. *fluere*, *fluxum*, to flow. See **FLUENT**; cf. **FLUSH**, *n.* (of cards).] 1. *Med.*

a A flowing or fluid discharge from the bowels or other part: esp., an excessive and morbid discharge: as, the bloody flux, or dysentery. b The matter thus discharged.

2. Act of flowing: a continuous moving on or passing by, as of a flowing stream; a continuing succession of changes.

3. A stream; copious flow; flood; outflow.

4. The setting in of the tide toward the shore. Cf. **REFLUX**.

5. State of being liquid through heat; fusion. *Rare*.

6. A fusible glass used as a base for enamels; also, an easily fusible enamel used as a ground for enamel painting.

7. *Chem. & Metal.* a Any substance or mixture used to promote fusion, esp. the fusion of metals or minerals. Common metallurgical fluxes are silica and silicates (acidic), lime and limestone (basic), and fluorite (neutral). b Any substance applied to surfaces to be joined by soldering or welding, just prior to or during the operation, to clean and free them from oxide, thus promoting their union, as rosin.

8. *Math.* The integral over a surface of the normal component of a vector field. Cf. **STOKES' THEOREM**.

9. *Photom.* = 1st LIGHT, 18 b.

10. *Physics.* a The rate of flow or transfer of fluid or of energy across a surface. b By analogy, the surface integral of a vector distributed over a surface. Cf. **ELECTROSTATIC FLUX**, **MAGNETIC FLUX**.

11. *Plant Pathol.* A slime flux.

flux, *v.*; **FLUXED** (flükst); **FLUX'ING**. *Transitive:* 1. To cause to become fluid; to fuse; to treat with a flux.

2. To affect, or bring to a certain state, by subjecting to, or treating with, a flux. "Fluxed into another world." *South.*

3. *Med.* To cause a discharge from, as in purging.

—, *Intransitive:* 1. To flow freely. *Archaic.*

2. To become fluid; to melt.

3. To undergo a flux; specif., to bleed copiously. *Obs.*

flux (flüks), *adj.* [L. *fluxus*, fr. *fluere*. See **FLUX**, *n.*]

Manifesto:

2. To affect, or bring to a certain state, by subjecting to, or treating with, a flux. "Fluxed into another world." *South.*

3. *Med.* To cause a discharge from, as in purging.

flux (flüks), *n.* [OF., fr. L. *fluxus*, fr. *fluere*, *fluxum*, to flow. See **FLUENT**; cf. **FLUSH**, *n.* (of cards).] 1. *Med.*

a A flowing or fluid discharge from the bowels or other part: esp., an excessive and morbid discharge: as, the bloody flux, or dysentery. b The matter thus discharged.

Purge the world of bourgeois sickness, "intellectual", professional & commercialized culture, PURGE the world of dead art, imitation, artificial art, abstract art, illusionistic art, mathematical art, —
PURGE THE WORLD OF "AMERICANISM"

2. Act of flowing: a continuous moving on or passing by, as of a flowing stream; a continuing succession of changes.

3. A stream; copious flow; flood; outflow.

4. The setting in of the tide toward the shore. Cf. **REFLUX**.

5. State of being liquid through heat; fusion. *Rare*.

PROMOTE A REVOLUTIONARY FLOOD AND TIDE IN ART,
— Promote living art, anti-art, promote
NON ART REALITY to be
fully grasped by all peoples, not only
critics, dilettantes and professionals.

7. *Chem. & Metal.* a Any substance or mixture used to promote fusion, esp. the fusion of metals or minerals. author as group

The French literary critic Roland Barthes would say “that neutral, composite, oblique space where [her] subject slips away, the negative where all identity is lost, starting with the very identity of the body of writing.” Barthes criticizes the reader's tendency to consider aspects of the author's identity—his political views, historical context, religion, ethnicity, psychology, or other biographical or personal attributes—to distill meaning from his work. The word “composite” in the quote suggests that the author is a construction, a figure made bodily by way of the convergence of forces brought together by the overlap of larger social and linguistic structures. The figure of the author is a participant and product in a social structure.

Concretism

Maciunas explains:

Concretists prefer unity of form and content. They prefer the world of concrete reality rather than the artificial reality of abstraction. Thus in the plastic arts for instance, a concretist perceives and expresses a rotten tomato without changing its reality of form. In the end, the form and expression remain the same as the content and perception...In music a concretist perceives and expresses the material sound with all its polychromy and pitchlessness and incidentalness, rather than the immaterial abstracted and artificial sound of pure pitch.

Robert Watts, assembled by Brian Buczak and
Goefrey Hendricks, Flux Timekit, 1966/78

Gag objects are also central. Our next Fluxus artist, Peter Moore (1932-1993), was known as a photographer above all else. Mr. Moore, who was born in London, attended Haverford College and the Massachusetts Institute of Technology in the 1950's before going to work in the darkrooms of Life magazine. Here we are looking at Venetian Blinds.

Peter Moore, Venetian Blinds, Side A & B, 1966-67

Especially poignant is the woman's deadpan, rather serious visage. The piece brings to mind the words of Maciunus, who saw himself and other Fluxus participants as jokers. Maciunus once told a banker, "I make jokes," to which the banker's riposte was "Oh, you're not going to make a joke out of the mortgage now, will you?"

George Brecht studied from 1946–1950 at the Philadelphia College of Pharmacy and Science. From 1950–1965 he worked as a chemist and engineer.

Fluxus

iconoclasm and internationalism:

In Fluxus there has never been any attempt to agree on aims or methods; individuals with something unnameable in common have simply naturally coalesced to publish and perform their work. Perhaps this common something is a feeling that the bounds of art are much wider than they have conventionally seemed, or that art and certain long-established bounds are no longer very useful. At any rate, individuals in Europe, the US, and Japan have discovered each other's work and found it nourishing (or something) and have grown objects and events which are original and often uncategorizable in a strange way.

George Brecht

George Brecht, *Water Yam*, 1959-66

After taking the class with John Cage, Fluxus artists began experimenting with the kind of event cards for which they would become well-known, an evocative form whose power is best appreciated in the 1959-66 works of George Brecht published by the movement's impresario George Maciunas in a box called *Water Yam*. While most Fluxus event cards are performance scripts, *Water Yam* also includes instructions for the creation of objects or tableaux - obscure directions whose realization left almost everything to the realizer.

EVENT SCORES

THREE TELEPHONE EVENTS

- When the telephone rings, it is allowed to continue ringing, until it stops.
- When the telephone rings, the receiver is lifted, then replaced.
- When the telephone rings, it is answered.

Performance note: Each event comprises all occurrences within its duration.

Spring, 1961

INCLINED PLANE PUZZLE

Place ball on inclined surface.
Observe the ball rolling uphill.

Another performance by Brecht, Concerto for Orchestra, Fluxversion 3, involved the following. "The orchestra is divided into two teams, winds and strings, sitting in opposing rows. Wind instruments must be prepared so as to be able to shoot out peas. This can be accomplished by inserting a long, narrow tube into wind instruments. String instruments are strung with rubber bands which are used to shoot paper missiles. Performers must hit a performer on the opposite team with a missile. A performer hit three times must leave the stage. Missiles are exchanged until all performers on one side are gone. Conductor acts as referee."

George Brecht, Games & Puzzles: Inclined Plane Puzzle, 1965

Dick Higgins, Danger Music No. 2, Wiesbaden, 1962

Dick Higgins (1938-1998)

Still from video at Drawn from Score, an exhibition Feb. 2018 at the Beall Center for Art and Technology, University of California, Irvine

His most notable contributions include "Danger Music" scores and the use of the term *intermedia* to describe the ineffable interdisciplinary activities that became prevalent in the 1960s. The score for this piece reads: "Scream! Scream! Scream! Scream! Scream! Scream! Scream! Scream!" And the way it's conventionally performed is: you scream as loud as you can until you pretty much lose your voice.

Dick Higgins, Danger Music No. 2, Wiesbaden, 1962

STATEMENT ON INTERMEDIA

Dick Higgins [1966]

Art is one of the ways that people communicate. It is difficult for me to imagine a serious person attacking any means of communication per se. Our real enemies are the ones who send us to die in pointless wars or to live lives which are reduced to drudgery, not the people who use other means of communication from those which we find most appropriate to the present situation. When these are attacked, a diversion has been established which only serves the interests of our real enemies.

However, due to the spread of mass literacy, to television and the transistor radio, our sensitivities have changed. The very complexity of this impact gives us a taste for simplicity, for an art which is based on the underlying images that an artist has always used to make his point. As with the cubists, we are asking for a new way of looking at things, but more totally, since we are more impatient and more anxious to go to the basic images. This explains the impact of Happenings, event pieces, mixed media films.

For the last ten years or so, artists have changed their media to suit this situation, to the point where the media have broken down in their traditional forms, and have become merely puristic points of reference. The idea has arisen, as if by spontaneous combustion throughout the entire world, that these points are arbitrary and only useful as critical tools, in saying that such-and-such a work is basically musical, but also poetry. This is the intermedial approach, to emphasize the dialectic between the media. A composer is a dead man unless he composes for all the media and for his world.

George Maciuinas, Dick Higgins, Wolf Vostell, Benjamin Patterson, Emmett Williams, Piano Activities, Wiesbaden, 1962

Nam June Paik was born in 1932 in Seoul, Korea. From 1953-56 he studied music, history, art history and philosophy at the University of Tokyo, where he wrote his dissertation on the modern composer Arnold Schönberg. He met John Cage in 1958 in Darmstadt and worked with Karlheinz Stockhausen, another modern/postmodern composer at the electronic music studio in Cologne

Nam June Paik at performance

Nam June Paik, Simple, Wiesbaden, 1962

In the performance "Simple," Paik did the following scripted act: 1.) threw peas into auditorium; 2.) smeared shaving cream on his body; 3.) put rice in shaving cream; 4.) slowly unwound a roll of paper; 5.) went into a pool of water; 6.) came back and played piano with baby doll in mouth.

Knowles, b. 1933

Alison Knowles (born 1933) is an American visual artist known for her installations, performances, soundworks, and publications. Knowles was a founding member of the Fluxus movement, the experimental avant-garde group formally founded in 1962. Criteria that have come to distinguish her work as an artist are the arena of performance, the indeterminacy of her event scores resulting in the deauthorization of the work, and the element of tactile participation.

Alison Knowles, Music by Alison, May 23, 1964

Unlike a traditional bound volume, the pages of this work are tiny paper scrolls, which the reader may select and view in any order. On each scroll, Knowles printed found texts collected from songs, recipes, stories, science, cartoons, and advertisements. The tin also contains dried beans, which create a rattling sound as the container is handled. In the 1960s, Knowles expanded on this performative aspect of *Bean Rolls* by staging readings with multiple participants.

Alison Knowles, *The Bean Rolls*, 1964

Alison Knowles, The Big Book, 1967

Knowles expanded the scale of her book projects with *The Big Book* (1967), a walk-in construction composed of eight moveable “pages,” each four feet wide by eight feet tall, anchored to a metal spine. Each page featured an access point leading to the next, forming different spaces and ways the reader could approach the book. The composition weighed about a ton, and contained a gallery, library, grass tunnel, and window. It was built using found materials such as a toilet, stove, and telephone from her apartment and studio, and could be packaged and shipped in two crates

Alison Knowles, *The Big Book*, 1967

Alison Knowles' computer-generated poem and sculpture *House of Dust* was created in association with James Tenney. The work had its beginnings at an informal Fluxus seminar in 1967 in which Tenney, who had been a composer-in-residence at the Bell Labs in the early '60s, demonstrated how the Fortran programming language could be employed in chance operations in artmaking. Knowles' contribution to the session was a poem of the in which combinations of the variables were randomly generated. It's generally considered to be the first computer-generated poem. Knowles then embarked on the creation of a large interactive public sculpture and sound installation inspired by one quatrain of the poem ("a house of dust, on open ground, lit by natural light, inhabited by friends and enemies"), in which electronic sensors would control sound equipment in response to varying light levels. The sculpture was briefly installed on the lawn of New York's Penn South housing co-op, but it generated opposition from residents and was ultimately set on fire by an arsonist, a surprisingly violent expression of hostility toward a work of public art. In 1970 Knowles brought the reconstructed *House of Dust* with her to CalArts.

Gathering inside the House of Dust for a screening, c. 1974

From roughly 10,000 possible stanzas, Knowles selected one quatrain—"a house of dust / on open ground / lit by natural light / inhabited by friends and enemies"—as the basis for an interactive sculpture on the California Institute of the Arts campus in the early 1970s.

Allison Knowles
and James
Tenney,
The House of
Dust, 1974

It consists of the phrase “a house of” followed by a randomized sequence of 1) a material, 2) a site or situation, a light source, and 3) a category of inhabitants taken from four distinct lists.

A HOUSE OF DUST
IN A DESERTED FACTORY
USING NATURAL LIGHT
INHABITED BY PEOPLE WHO ENJOY EATING TOGETHER

A HOUSE OF STONE
UNDERWATER
USING NATURAL LIGHT
INHABITED BY PEOPLE WHO ENJOY EATING TOGETHER

A HOUSE OF GLASS
IN SOUTHERN FRANCE
USING CANDLES
INHABITED BY VERY TALL PEOPLE

A HOUSE OF TIN
ON THE SEA
USING CANDLES
INHABITED BY NEGROS WEARING ALL COLORS

A HOUSE OF MUD
INSIDE A MOUNTAIN
USING CANDLES
INHABITED BY NEGROS WEARING ALL COLORS

A HOUSE OF WEEDS
IN AN OVERPOPULATED AREA
USING ALL AVAILABLE LIGHTING
INHABITED BY HORSES AND BIRDS

A HOUSE OF ROOTS
IN JAPAN
USING ELECTRICITY
INHABITED BY PEOPLE WHO EAT A GREAT DEAL

A HOUSE OF ROOTS
AMONG HIGH MOUNTAINS
USING CANDLES
INHABITED BY PEOPLE WHO SLEEP VERY LITTLE

A HOUSE OF SAND
INSIDE A MOUNTAIN
USING CANDLES
INHABITED BY NEGROS WEARING ALL COLORS

A HOUSE OF WEEDS
IN A PLACE WITH BOTH HEAVY RAIN AND BRIGHT SUN
USING CANDLES
INHABITED BY PEOPLE WHO EAT A GREAT DEAL

A HOUSE OF BROKEN DISHES
ON THE SEA
USING ALL AVAILABLE LIGHTING
INHABITED BY LOVERS

Alison Knowles, *Make a Salad* [Event Score], 1962/2012
Event scores involve simple actions, ideas, and objects from everyday life recontextualized as performance. While each iteration of the piece is unique, the basic ingredients include Knowles preparing a massive salad by chopping the ingredients to live music, tossing it in the air, then serving it to the audience.

Living Sculpture was a performance-installation work that required the artist to live and work for two weeks in the sidewalk window of a London gallery.

Born in 1937 in Niigata, Japan, Shigeko Kubota became a key member of the Japanese avant-garde, a respected participant in New York Fluxus events in the 1960s, and, starting in the 1970s, a pioneering practitioner of video art.

Shigeko Kubota, Vagina Painting, 1965

Kubota's most infamous (and somewhat anomalous) work was *Vagina Painting* (1965), which she presented as part of the Perpetual Fluxfest, at Cinematheque in New York on July 4, 1965. In this performance, she attached the handle of a paintbrush to her underwear, squatted over a bucket of red paint, and waddled across a large sheet of paper laid on the floor, creating red, menstrual-like smears.

Shigeko Kubota, *Vagina Painting*, 1965

This piece functioned as a send-up of what the influential art critic Harold Rosenberg termed “action painting” by feminizing the hyper-masculine, phallus-as-paintbrush image of Abstract Expressionist painters like Jackson Pollock. It also may have been a reference to the practice of lower-class geishas, who sometimes entertained customers by writing calligraphy with brushes inserted in their vaginas. Kubota’s performance fused dichotomies, combining high and low arts, masculine and feminine elements, and Eastern and Western cultures.
